This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

The following pages are intended as a supplement to the Index of the Session Laws of New York State, prepared, in 1897, by William H. Silvernail. That book covered the statutes from the time of the organization of the State to and including the end of the year 1896. The present volume covers the Session Laws from January 1, 1897, to January 1, 1901.

The general plan of the earlier work has been followed, with some modifications. All the matters relating to particular cities have been placed under such cities, and, as a general rule, each subject has been placed by itself instead of being grouped under general heads. The index has been made very full; for example, references to amendments to the Codes appear under the proper alphabetical subjects, and also under the Codes themselves, where lists are given of the sections amended from time to time.

By means of the original index and this supplement, public officials, the bar and the public are furnished, in substantially one work, with a complete alphabetical and chronological index of all the statutes of the State of New York — an end very much to be desired. The statutes, especially the local and private laws, are practically inaccessible and useless, unless a thorough index is provided either by the State, or by the efforts of private citizens. These indices have usually been undertaken by the State, but an examination of those prepared and published in New York shows that in this, as in many other matters relating to our statutes, satisfactory work is not done in the name of the State. In England and other countries the subject of indexing the laws has been put

in charge of important commissions, composed of eminent lawyers, who have prepared the most elaborate and exhaustive indices of the statute law, at an expense which would be considered prohibitive with us, but which they felt was well spent.

The present work, prepared entirely without State aid, has been undertaken with a desire to furnish what the State has failed to supply.

INDEX TO SESSION LAWS.

Academies.

Appropriation for; dividends to; teachers' classes in; union free schools; academic departments — L. 1897, cs. 306, 790; L. 1898, cs. 593, 606; L. 1899, cs. 569, 570; L. 1900, c. 418.
